

SEDATED ABR INSTRUCTIONS: 6 MONTHS- 3.5 YEARS OLD/Under 40 LBs

Please Read These Instructions Carefully

Your child has been scheduled for a special hearing test called a threshold Auditory Brainstem Response (ABR), most commonly abbreviated as ABR. The ABR evaluation is a test that evaluates how well the sound travels from the ear to the level of the brainstem. ABR responses are recorded by placing 3 stickers called electrodes on the child, one on his/her forehead and one behind each ear, and then stimulating the ear with brief auditory signals via insert earphones.

By placing electrodes on the child's head, the ABR is testing the neural electrical activity from areas within the cochlea, 8th nerve, and the brainstem in response to an auditory stimulus. This neural activity allows the audiologist to mark responses on the waves recorded in response to stimulation presented at different intensity levels across low and high frequencies or pitches. The lowest level at which neural responses are obtained is considered the threshold of hearing for that particular frequency.

In order to obtain reliable information regarding your child's hearing status, the ABR test will be performed while your child is asleep as noise and movement can affect test results. For children older than 6 months, oral sedation will be utilized to help you child sleep through the test session. Please note that oral sedation is not effective in all children and therefore there is a chance that the ABR may not be completed. The sedation nurse will contact you 24-48 hours prior to your appointment. If you do not speak with the sedation nurse prior to the appointment, testing cannot be completed.

We will need your assistance with the following:

- ❖ **NO food, breast milk, milk or formula, etc. 6 hours prior to your appointment time.**
- ❖ **Your child may have CLEAR LIQUIDS (water or Pedialyte) up UNTIL 2 hours prior to your appointment time**
- ❖ **PLEASE DO NOT** let him/her sleep on the way to the appointment. It may be helpful to have a friend or family member drive you to the appointment so you can keep your baby awake during the drive.
- ❖ **PLEASE** bring a container of clear liquid (apple juice, Pedialyte, water) for your child to drink after the evaluation is completed. Milk or formula will not be allowed until he/she has had clear liquids.
- ❖ You should bring a blanket, swaddle and/or comfort toy to the appointment so your child will be comfortable during the testing.
- ❖ Most parents find it helpful to bring a friend or family member to the appointment with them as we will be discussing the results after the test.

Patient Appointment Agreement for Audiology Services

Thank you for choosing The Hearing Center at Dallas Ear Institute for your hearing healthcare needs!

Due to the personnel resources and time commitment needed to provide the complex services offered, it is imperative that our patients be very faithful in keeping their scheduled appointments. We understand that unforeseen events occur that require last minute cancellations of appointments. However, Dallas Ear Institute cannot be expected to bear the financial loss that occurs when this reserved appointment time goes unutilized.

In order to ensure your commitment to reserving our time to provide these services, we are informing you up front that you will be billed a \$150 cancellation fee if you cancel within less than two (2) business days notice or do not show up for your scheduled appointment, except in the event of a true emergency. This is a charge that your insurance company, Medicare or Medicaid will not cover. Payment of the cancellation fee will be due prior to rescheduling.

Thank you very much for your cooperation.
